EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Yoon S. Ham on 7/11/06.

The application has been amended as follows:

Claim 1, lines 3-4, after the word "terminal", "being capable of" has been deleted.

Claim 8, line 3, after the word "terminal", "being capable of" has been deleted.

Claim 13, line 3, after the word "terminal", "being capable of" has been deleted.

Reasons For Allowance

2. The following is an examiner's statement of reasons for allowance:

Regarding claim 1, Prior Art fails to disclose the steps of inserting information of the terminal capability operable in the asynchronous network system in an originating message including a protocol revision number if the dual mode terminal is operative in service area of the synchronous network system and a controller installed in the synchronous network system checks, based on the received terminal capability information, whether or not the dual-mode terminal can access the asynchronous network system and if accessible, sends information on the

adjacent cells of the asynchronous system in combination with other limitation set forth in the claims.

Regarding claim 8, Prior Art fails to disclose the steps of checking, based on the received terminal capability information, whether or not the dual-mode terminal can access the asynchronous network system and synchronous network system respectively and sending information of adjacent cells of the asynchronous network system to the dual-mode terminal if accessible, at the side of a first and second controller respectively installed in the synchronous and asynchronous network systems respectively.

Regarding claim 13, Prior Art fails to disclose the steps of inserting information in a terminal capability message including a protocol revision number operative if the dual mode terminal is operative in service area of the asynchronous network system and a controller installed in the asynchronous network system checks, based on the received terminal capability information, whether or not the dual-mode terminal can access the synchronous network system and if accessible, sends information on the adjacent cells of the synchronous system in combination with other limitation set forth in the claims.

Conclusion

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
